Replace Dodge Ram Driver Seat Cushion Without Removing Seat Contrary to most of the tips I read, it is not necessary to remove the driver's seat to replace the bottom cushion.. That's a rather big bummer for full-time RVers logging lots of miles like us When our mechanic friend turned us on to Geno's Garage, I was excited to discover they had high quality replacement seat cushions with excellent reviews at an affordable price—at least much more affordable than replacing the whole seat.. The first step was to remove the seat recline handle and control button cover using a Phillips screwdriver.

I was also able to reach under and release the front clip by hand For the opposite side, I inserted a large flathead screwdriver into the exposed groove and pushed the clip off its rail.. That and a large flat screwdriver were the only tools I used Dodge charger r/t oem alcantara / leather seats they are black in color these seats were taken from a 2018 dodge charger r/t with 13k miles there are no rips holes burns or tears see photos both seat tracks are included seat tracks have been tested drivers and passenger are powered both seats are fully powered both seats are heated and cooled.

I was even more excited to learn how easy the job would be Check out these simple steps I took, or watch the how to video for replacing the seat cushion below.. It was only slightly more difficult yo put back on The “m” shaped clips holding the sides of the cover to the rails underneath the seat came off the outer side with ease.. Prepared to wrestle with, or rip, the seat cushion cover, I was surprised at how easily it came off. [William Shakespeare](#)
