I store my makeup in it's separately makeup room (you can see my post here of my Makeup Room) so I think that helps..
Staying Power: I'll preface by saying I do not give in the hype of brands that market their product with things like '24hrs'.. • All must be marked NSFW • of Youtube/social media/blogs/your business; limited linking in comments is acceptable.

Any idea if Barely Beige is a dupe for/very similar to MAC Bare Study paint pot? I just got Bare Study so I don't want to keep looking all over the place for the Maybelline one when I already have something very similar.. • Every makeup look and collection must have a in the comments In select circumstances incomplete product lists can be accepted if you seek permission from the moderators prior to posting.. I've had some of my CT for about a year and it's perfectly fine I believe that if you keep them sealed properly and keep good care of your makeup, it shouldn't be an issue.

S At the drugstores 1 CT usually runs around \$5 99-\$7 99 depending on where you get it.. Neither creased if worn as a base
Color Pay-Off: PP has a better color pay-off than the CT.. A single swipe of PP has a better pay off than a single swipe of CT
Lasting Over Time: I've read the stories of people having issues of their paint pots drying.. I cannot give a fair comparison because I haven't had my paint pots long I've had Soft Ochre for about a month and it's still perfectly fine. 0041d406d9 [Scan Will Not Complete](#)
